

WHITE PORCELAIN Adhesive Powder | **AP-6**

Romolo White porcelain tile adhesive powder is a high-quality product made from mineral micronized powders, mussel powder, and chemical additives. It is specially formulated using ionization technology, providing excellent adhesion to various building materials. It is also lightweight, making it ideal for reducing the overall load on the structure. Additionally, it is user-friendly and suitable for easy installation of different types of stone, ceramic, and porcelain tiles, both indoors and outdoors.

Physical And Chemical Specs

Special Weight	4 gr/cm ³
Color	White
Physical Form	Powder
PH	7-8
Average Particle Size	300 mesh
Shear Adhesion Strength	1/4 < M pa
Density	4 ± 0.1 gr/cm ³
Adhesion Time	20 min
Drying Time	60 min
Mix Percentage With Water	25-30 %
Impermeability	70 %
Application Temp	5-40 C

Packaging

20 KG

Specifications :

- Quick drying and adhesion
- Compatible with various climates
- Quick preparation and application
- Can be applied in thin and thick layers
- Highly resistant against acids and petroleum
- Easy to install in horizontal and vertical surfaces
- Highly resistant against humidity, water and steam
- Excellent adhesion to all kinds of building materials
- Highly flexible, preventing tiles and slabs from falling or cracking.

Applications:

- Can be installed on tiles, glass, clay surfaces
- Can be installed on panels, and wood surfaces
- Can be applied to plaster surfaces, cement surfaces
- Can be installed on concrete surfaces, prefabricated parts
- Usable for porcelain ceramic installations on floors, walls, and elevations
- Ideal for various materials such as tiles, ceramics, antique stones, and plastic stones

How to use:

Clean the surface thoroughly and create scratches for better adhesion. Mix **4 kg** of powder with **1 liter** of water. Apply the mortar behind the tile and install it at the desired level. Consumption is typically **4-5 kg per square meter**.

Attention:

The suitable temperature range for using the adhesive is **5-40°C**. This adhesive has high adhesion due to its low water absorption and should be used within **15-20 minutes** after mixing with water.

Packaging

Romolo White porcelain tile adhesive powder is offered in **20kg** bags for your ease of use and preference.

Storage

The recommended temperature range for storing the tile adhesive is between **10-30°C**. The product has a shelf life of 9 months when kept in its original, unopened packaging. It is important to store it away from direct sunlight, extreme cold, heat, and frost to maintain its quality and effectiveness.

Safety

To ensure safety, it is advised to avoid direct contact with the eyes and skin. It is recommended to wear gloves and protective glasses when handling the product. In the event of accidental contact with the eyes, it is crucial to immediately rinse them with lukewarm water for a minimum of 15 minutes.

! The suitable working temperature is between 5 to 40 degrees Celsius, the drying time varies between 12 to 72 hours depending on the weather conditions.
