## Storage

The suitable temperature for storing the product is 10-30 degrees Celsius, the useful life of this product is one year provided that it is kept in a covered environment and away from moisture, freezing, extreme heat and direct sunlight.

## Safety Cautions

Avoid direct contact with eyes and skin. Use gloves, glasses and appropriate clothing during application. In case of possible contact with eyes, wash immediately with lukewarm water for 15 minutes.

## Packages

Romolo's CL20 cleaning liquid or cement cleaning solution is produced and supplied in 1 kg packages.

## How to Use

First, clean the desired surface from any kind of dust, then wait until the desired surface is completely dry, then apply CL20 cement cleaning solution on the desired place and let it stay on the surface for 3-5 minutes. Then wash the whole surface with plenty of water.

### Note:

Avoid using the above solution on all heated surfaces exposed to sunlight. The above solution is not suitable for use on acid-sensitive surfaces, metal, marble and limestone. And avoid mixing the above solution with water. Note that the temperature of the applied surface is above zero degrees.

## Attention

The suitable temperature for using powder glue is 5-40 degrees Celsius. Romolo white porcelain powder glue has a very high adhesion due to its very low water absorption and almost 1%, and the best time to use it after mixing with water is 15-20 minutes.
